Declaration of AI Use

OPSC7311 · POE Part 3 — Final App Development · Pulse: Personal Budget Tracker

Group

Name	Student number
Sechaba Mokoena	ST10453270
Sufyaan Albertus	ST10436103
Latita Mvunelo	ST10093388
Sandile Duba	ST10262263
Rea Moloi	ST10443585

Tool used

Claude (Anthropic), used through claude.ai on 14 October 2026.

What we used AI for

- **Design:** ideas for making the screens clearer and easier to read, and the app icon.
- **Code assistance:** help writing code for the Part 3 features: moving our data to Firebase, the category graph with min/max goals, the 30-day goal tracker, recurring expenses, badge progress and strong passwords.
- **Project setup and fixing problems:** help setting up Firebase, GitHub Actions and the project structure, and help fixing build errors and conflicts.
- **Documentation:** help drafting the README and setup guides.

What we did ourselves

- Planned the app and its features, including our own features (gamification and recurring expenses).
- Set up the Firebase project, built and ran the app, and tested every feature.
- Reviewed and changed the AI's suggestions before using them, and checked that our data is stored online.
- Managed the GitHub repository and recorded the demo video.

Our statement

We used AI as a helper, not as a replacement for our own work. We checked and tested everything we used, and we understand and can explain all of the code we are submitting.
